

Rome, 10.11.2020

To whom it may concern and

To the new President of USA

Mr. JOE BIDEN

The White House – Washington (USA)

Honourable Mister President,

It has been a great pleasure finally for us to hear that returning to the guide of the Great Nation America is a person who cares for the future of humanity and, therefore, the environmental protection and the climate mitigation against the profit of a few speculators who, instead, do not care about climate and environmental.

We are taking this opportunity to interpret the satisfaction of Italian environmentalist not only but also of the whole world. We do thank you then for your will to accede to the Paris agreement regarding the climate.

On this opportunity, we would be happy if our project “ I am doing my part” just launched in Italy, in which every human being in its own small way can contribute to the safeguard of the planet, could also be taken in consideration in the USA. In relation to this, we are willing to cooperate eventually with environmentalist experts of your staff.

We now conclude wishing you a bright and fruitful non only in the matters of environment and climate, but also regarding a word without famine, hunger and wars.

Sincerely

The President

Franco Floris
